

KodetoCareer — UI/UX Design Brief

Version 1.0 | For Design Team

1. Design Philosophy

The KodetoCareer platform must feel professional, trustworthy, and motivating — not like a generic ed-tech template. Students in tier-2 and tier-3 colleges are comparing this to BYJU's, YouTube, and Instagram. The design must earn their daily engagement.

Three Design Principles:

1. Progress is Visible at All Times

Every screen should answer "How am I doing?" before the user asks. Progress bars, streak counters, rank badges, and skill indicators must be persistent and satisfying. When a student completes something, the interface celebrates it.

2. Clarity Over Cleverness

Every trainer and college admin using the admin panel may not be technically sophisticated. Navigation must be obvious. Labels must be plain language. No icon-only buttons without labels. Every action must have a confirmation and a success state.

3. India-First Design

Design for variable connectivity. Skeletons over spinners. Offline-first for previously viewed content. Compress and lazy-load aggressively. Support right-to-left layouts from day one even if not launched. Respect data consciousness: show "this video is 45MB" before streaming.

2. Brand Identity

2.1 Brand Personality

- **Confident** — not arrogant. A mentor who believes in the student.
- **Modern** — reflects contemporary tech industry aesthetics, not traditional educational imagery.
- **Warm** — achieves professional tone without feeling cold or corporate.
- **Achievement-focused** — every visual element should imply progress and success.

2.2 Logo Usage

- Primary logo: "KodetoCareer" wordmark with code icon integrated into the 'K'
- Icon-only version for app icon and favicons
- Minimum size: 120px wide for horizontal, 32px for icon-only
- Never stretch, recolour, or place on busy backgrounds

3. Colour System

3.1 Primary Palette

Primary Blue	#1E3A8A	– Main CTAs, links, active states
Light Blue	#3B82F6	– Hover states, secondary highlights
Accent Green	#10B981	– Success states, completed items, "passed" badges
Warning Amber	#F59E0B	– Alerts, pending actions, "at risk" indicators
Danger Red	#EF4444	– Errors, failed states, "below threshold" alerts

3.2 Neutral Palette

Background	#F8FAFC	– App background (light mode)
Surface	#FFFFFF	– Cards, modals, panels
Border	#E2E8F0	– Dividers, card borders
Text Primary	#0F172A	– Headlines, primary content
Text Secondary	#475569	– Labels, descriptions, metadata
Text Disabled	#94A3B8	– Disabled states, placeholder text

3.3 Dark Mode (Mobile App — Phase 2)

Background	#0F172A
Surface	#1E293B
Border	#334155
Text Primary	#F1F5F9
Text Secondary	#94A3B8

3.4 Semantic Colour Usage

Situation | Colour | Use Case

Completed | #10B981 (Green) | Lesson done, quiz passed, certificate issued

In Progress | #3B82F6 (Blue) | Active lesson, ongoing quiz attempt

Pending | #F59E0B (Amber) | Assignment due, quiz approaching

Failed / At Risk | #EF4444 (Red) | Quiz failed, attendance below threshold

Locked | #94A3B8 (Grey) | Locked module, unavailable feature

Not Started | #CBD5E1 (Light Grey) | Not yet begun lesson/module

4. Typography

4.1 Type Scale

Mobile App (Flutter):

Role | Font | Size | Weight

Display | Inter | 28px | 700 Bold

Heading 1 | Inter | 22px | 700 Bold

Heading 2 | Inter | 18px | 600 SemiBold

Heading 3 | Inter | 16px | 600 SemiBold

Body Large | Inter | 15px | 400 Regular

Body | Inter | 14px | 400 Regular

Caption | Inter | 12px | 400 Regular

Label | Inter | 12px | 500 Medium

Button | Inter | 14px | 600 SemiBold

Web Admin Panel (React):

Role | Font | Size | Weight

Page Title | Inter | 24px | 700 Bold

Section Header | Inter | 18px | 600 SemiBold

Table Header | Inter | 13px | 600 SemiBold

Table Cell | Inter | 14px | 400 Regular

Body | Inter | 14px | 400 Regular

Caption | Inter | 12px | 400 Regular

Button | Inter | 13px | 600 SemiBold

Font Source: Google Fonts — Inter (all weights)

Code Font: JetBrains Mono (for code snippets in lessons)

4.2 Line Heights

- Headings: 1.2
- Body text: 1.6
- Table cells: 1.4

5. Spacing System

Uses an 8px base grid. All spacing values are multiples of 8 (with 4px as a half-step).

```
4px    - xs  (icon internal padding, inline elements)
8px    - sm  (component internal spacing)
12px   - md- (list item gap)
16px   - md  (card padding, section gaps)
24px   - lg  (section padding)
32px   - xl  (page section gaps)
48px   - 2xl (major section separators)
64px   - 3xl (hero areas)
```

6. Component Library

6.1 Buttons

Primary Button

- Background: #1E3A8A | Text: White
- Hover: #1E40AF | Active: #1E3A8A + scale(0.98)
- Disabled: #94A3B8 background, no cursor
- Height: 48px (mobile), 40px (web)
- Border radius: 8px
- Full width on mobile, auto-width on web

Secondary Button

- Background: White | Border: #1E3A8A | Text: #1E3A8A
- Hover: #EFF6FF background

Danger Button

- Background: #EF4444 | Text: White
- Used only for destructive actions (deactivate, delete)

- Requires confirmation dialog

Ghost Button

- No background or border | Text: #1E3A8A
- Used for tertiary actions

Icon Button

- 40×40px touch target minimum on mobile
- Always has an accessible aria-label

6.2 Cards

Standard Card

- Background: #FFFFFF
- Border: 1px solid #E2E8F0
- Border radius: 12px
- Shadow: 0 1px 3px rgba(0,0,0,0.08), 0 1px 2px rgba(0,0,0,0.04)
- Padding: 16px

Metric Card (KPI)

- Same as standard but with coloured left border (4px) matching metric type
- Icon top-left, value large (24px Bold), label below (12px Secondary)

Course Card (mobile)

- Thumbnail 16:9 top section
- Course name, progress bar, completion %, trainer name
- Tap entire card to navigate
- Skeleton loader: show animated grey placeholder while loading

6.3 Form Elements

Input Field

- Height: 48px (mobile), 40px (web)
- Border: 1px solid #CBD5E1
- Focus border: 2px solid #1E3A8A
- Error border: 2px solid #EF4444
- Error message: 12px Red below field
- Label: 13px Medium, above field, 4px gap
- Placeholder: #94A3B8

Dropdown / Select

- Same styling as input
- Custom dropdown panel with search for lists > 10 items
- Multi-select with chips (tag removable with ×)

Toggle / Switch

- Off: #CBD5E1 | On: #1E3A8A
- 24×14px (web), 28×16px (mobile)

Checkbox & Radio

- Custom styled (not browser default)
- Selected state: #1E3A8A fill with white checkmark
- Accessible: visible focus ring on keyboard navigation

6.4 Data Display

Table (Admin Web)

- Header row: #F8FAFC background, 13px SemiBold
- Row height: 52px
- Alternating row colour (subtle): every other row #F8FAFC
- Hover state: #F1F5F9 row background
- Action buttons always in last column
- Sticky header on scroll
- Empty state: illustration + message + action button

Progress Bar

- Height: 8px (standard), 4px (compact)
- Track: #E2E8F0
- Fill: gradient from #3B82F6 to #1E3A8A
- Shows percentage label at end of bar

Badge / Tag

- Height: 22px
- Rounded pill (border-radius: 100px)
- Size: 11px SemiBold, uppercase
- Colour variants: Green (success), Amber (warning), Red (danger), Blue (info), Grey (neutral)

6.5 Navigation

Mobile Bottom Navigation

- 5 tabs maximum

- Active tab: #1E3A8A icon + label
- Inactive tab: #94A3B8 icon + label
- Active indicator: 3px top border on tab
- Tab bar background: White with top border

Web Sidebar

- Width: 240px (expanded), 64px (collapsed)
- Background: #0F172A (dark)
- Active item: #1E3A8A left indicator + #1E293B background
- Hover: #1E293B background
- Section dividers: 16px gap + small label in #475569
- Logo area: top 64px
- Collapsible on desktop (saves to localStorage)

6.6 Empty States

Every list, table, or content area must have a designed empty state:

- Illustration (simple line art, consistent style)
- Title: "No [items] yet"
- Description: what would appear here and why it's empty
- Primary action button if applicable

Examples:

- No students enrolled: "No students in this batch yet" + [Import Students]
- No quizzes created: "No quizzes for this course" + [Create Quiz]
- No notifications: "You're all caught up!" + illustration of checkmark

6.7 Loading States

Skeleton Screens (preferred over spinners for content loading):

- Grey animated gradient rectangles matching the shape of content
- Used for: course list, student table, dashboard metrics

Spinner (for actions/button states):

- 24px circular spinner in Primary Blue
- Appears in button while API call is in flight
- Button text changes to "Saving..." during load

Progress Indicator (for uploads):

- Linear progress bar with percentage

- Estimated time remaining for large files
- Cancel button for uploads > 10 seconds

7. Iconography

Icon Library: Lucide Icons (open source, consistent stroke weight)

Style: Outline (not filled) for UI icons

Size: 20px standard, 16px compact, 24px feature icons

Colour: Inherits from text colour or specific semantic colour

Never: Use more than one icon style in the same screen

Feature Icon Set (24px, custom illustrations):

These are used in onboarding, empty states, and feature cards:

- Learning / Books
- Certificate / Badge
- Placement / Briefcase
- Quiz / Document-check
- Attendance / Calendar-check
- Progress / Bar-chart
- Community / Users

8. Mobile-Specific Design

8.1 Touch Targets

- Minimum touch target: 44×44px for all interactive elements
- Increase hit area with padding, not visual size

8.2 Gestures

- Swipe right: Go back (matches iOS/Android native behaviour)
- Pull to refresh: Refresh current list
- Long press on list items: Show context menu (delete, edit)
- Swipe to dismiss: Notifications in notification centre

8.3 Status Bar

- Light content on dark header
- Use `SystemChrome.setSystemUIOverlayStyle` in Flutter

8.4 Safe Areas

- All layouts must respect `SafeArea` widget in Flutter
- Bottom navigation must account for iPhone home indicator

8.5 Keyboard Behaviour

- All forms scroll up when keyboard appears
- "Next" keyboard action moves to next field
- "Done" keyboard action on last field submits or closes

9. Motion & Animation

Guiding Principle: Animation confirms state changes, guides attention, and rewards achievement. It should never slow the user down.

Animation | Duration | Easing | Usage

Screen transition | 250ms | ease-in-out | Route changes

Modal / Bottom sheet enter | 300ms | ease-out | Modal appearance

Modal dismiss | 200ms | ease-in | Modal dismiss

Button press | 100ms | ease | Scale press effect

Toast notification | 200ms enter, 150ms exit | ease | Toast alerts

Skeleton to content | 200ms | ease | Content loaded

Progress bar fill | 600ms | ease-out | On load / update

Confetti / Celebration | 1500ms | custom | Lesson complete, certificate

Achievement animations (Flutter + Lottie):

- Lesson complete: subtle checkmark animation (500ms)
- Module complete: medium celebration animation (1000ms)
- Course complete: full confetti celebration (2000ms)
- Certificate earned: golden glow animation (1500ms)

10. Accessibility

- **Colour contrast:** All text meets WCAG AA minimum (4.5:1 for body, 3:1 for large text)
 - **Screen reader support:** All images have alt text, all icons have labels
 - **Focus management:** Keyboard navigation must work on all interactive elements on web
 - **Font scaling:** UI must not break at 150% text size on mobile
 - **Error identification:** Never use colour alone to indicate errors — always pair with text or icon
-
-

11. Screen-by-Screen Design Notes

Student App Screens

STUDENT_DASHBOARD

- Hero card with gradient background (#1E3A8A → #3B82F6)
- "Continue Learning" card is the largest element — thumb-accessible on mobile
- Placement readiness score: circular progress indicator with animated fill

LESSON_PLAYER

- Fullscreen by default on video content
- Double-tap left: -10 seconds | Double-tap right: +10 seconds
- Swipe up: show lesson notes panel as bottom sheet
- Status bar hidden in fullscreen

QUIZ_SCREEN

- Single question per screen (not all at once)
- Question counter and progress bar always visible at top
- Timer anchored top-right in fixed position
- Selected option highlights immediately (before Next tap)

Admin Panel Screens

SUPER_ADMIN_DASHBOARD

- Data-dense, information hierarchy critical
- Key metrics in top row — largest numbers on the page
- "Students at Risk" table below the fold — red left border on rows

- Charts use consistent colour palette

BATCH_CREATE_WIZARD

- Step indicator at top (1 of 3, 2 of 3, 3 of 3)
- Wide form on desktop — two columns on Step 1
- CSV preview table on Step 3 — validation errors in red inline

CERTIFICATE_MANAGEMENT

- Split view: eligibility table on left, certificate preview on right
- Green check / red X in Eligible column — immediately scannable

12. Design Deliverables Required

The design team should produce the following before development begins:

Priority 1 (needed for MVP):

- [] Design system / component library (Figma)
- [] Student app — all screens in Flow 3.1 through 3.6
- [] Admin panel — SUPER_ADMIN_DASHBOARD, COLLEGE_MANAGEMENT, BATCH_MANAGEMENT, ATTENDANCE_MARKING, CERTIFICATE_MANAGEMENT
- [] College admin portal — COLLEGE_DASHBOARD, STUDENT_LIST

Priority 2 (can be designed during development):

- [] Empty states for all screens
- [] Error states and error messages
- [] Loading/skeleton states
- [] Responsive breakpoints for admin panel (tablet)
- [] Trainer-specific views

Design Tool: Figma

Handoff Method: Figma Dev Mode

Asset Export: SVG for icons, PNG 2x for illustrations

End of UI/UX Design Brief
